

R417A (Freon™/ISCEON® M059). HFC blend retrofit refrigerant for R22 in commercial air conditioning.

Introduction R417A, also known as FREON/ISCEON® M059, is an HFC retrofit refrigerant for R22 in direct expansion stationary air conditioning (AC) and medium temperature commercial refrigeration systems.

Specifics/facts Zeotropic refrigerant blend containing R125, R134a and R600a. Refrigerant must be charged from the liquid phase to ensure accurate composition. GWP 2346.

Product specification

Cylinder size in litres	Content in kg	Item number
12	12	118041
61	59	118042*

*61L only on request

Advantages

- Zeotropic refrigerant blend
- Non-flammable with a safety classification of A1
- GWP (AR4) 2346
